

## Oral Surgery, Dental Implantology and All-on-4 Implants

An Oral Surgeon has an interest in surgery of the oro-pharyngeal area. An Implantologist is a dental surgeon that has a special interest in placing dental implants for patients with missing teeth. Implants are a long term reliable alternative to dentures and bridges.

### Dr Viraj Patel

Oral and Dental Implant Surgeon  
BDS(hons), MJDF RCS Eng, PgCert Clinical Teaching  
RCGP, PgDip in Advanced Implant Dentistry (NYU)

Viraj qualified as a dentist in 2012 and undertook hospital training in Maxillofacial and Oral surgery in 2014 and since has attended multiple Dental Implant courses within the UK. He also completed the world-renowned 2 year Advanced Implant Dentistry Program in New York; famous for training some of the lead dentists currently within the field of implants. Here he excelled, picking up multiple awards and gaining lots of clinical experience, which has led to him being invited to present his work and lecture on the global stage.

His main focus is in implant dentistry. He has also gained valuable experience in cosmetic dentistry including becoming a certified Cfast braces provider, Invisalign provider and Mini Smile Makeover provider.

Viraj prides himself on his ability to deal with nervous patients and make them feel comfortable within the dental setting.

### Dr Adeel Ali

Oral Surgeon and Implantology  
BDS MJDF RCS

Dr Ali has trained under some of the most prominent professors in dentistry and throughout his career he has sought to further his skills and develop his practice to the highest possible standards. Whilst studying, Dr Ali discovered a love for the artistic side of dentistry. By the fourth year of his studies, he was spending hours in the lab blending his scientific knowledge with the practical and aesthetic aspects of dentistry.

Dr Ali worked under the esteemed dental implant surgeon Dr Balwant Vekaria, a renowned lecturer and globally recognised expert in the area of implant surgery. Dr Ali chose to concentrate on implant dentistry as he was fascinated by the immense impact this restorative work had on patients' physical and emotional wellbeing and wanted to contribute to enhancing and improving the discipline.

## Periodontist

A periodontist is a dentist specialising in diseases of the gums and other structures surrounding the teeth.

### Dr Evdokia Chasioti

Specialist Periodontist and Implant Surgeon, DipDS, MDS,  
Diplomate of the American Board of Periodontology  
Pinhole Specialist

Evdokia Chasioti is a graduate of the Department of Dentistry of the historic Aristotle University of Thessaloniki in Greece.

In 2009, she joined the three year postgraduate specialist training program in Periodontics and Implant Dentistry at the prestigious University of Medicine and Dentistry of New Jersey (Rutgers School of Dental Medicine). Dr. Chasioti served as the Chief Resident of the department and she obtained her Masters of Dental Science in Periodontology with distinctions.

Dr. Chasioti is committed to practicing the highest level of dentistry based on her diverse expertise in numerous non surgical and surgical periodontal procedures including the Pinhole Gum Rejuvenation technique for gingival recession and dental implant coverage.

#### Treatments

- Non Surgical and Surgical Periodontal Treatment
- Periodontal Plastic Surgery
- Periodontal Reconstructive Surgery
- Dental Implants
- Pinhole Gum Rejuvenation
- Gingival Recession Coverage

## Dentist with special interest in Endodontics

### Dr Krishen Shah

BDS (Lond) MJDF RCS (Eng) PgCert (Dental Ed)  
MSc Endo (Lond)

Krishen is a highly motivated, hard working individual who qualified from King's College London in 2011.

Krishen genuinely enjoys all aspects of dentistry, with his main aim being providing high quality service to patients. To fulfill this he has undertaken several postgraduate courses therefore expanding the treatment choices he can offer, as well as keeping himself updated with the latest advances in dentistry. Krishen particularly enjoys undertaking complex root canal treatments (including re-treatments), with the use of the latest technology (direct operating microscope and a cone beam computerised tomography imaging). With a strong restorative background, he is competent in restoring heavily broken down teeth, removing crowns/posts prior to treatment, negotiating past blocked root canals as well as removing separated instruments more often than not.

#### Treatments

- Root Canal Treatments
- Complex Re-Root Canal Treatments

## Orthodontist

An orthodontist is a dental specialist that deals with the correction of misaligned teeth creating a straighter more beautiful smile. Orthodontic treatment usually involves wearing braces (removable, fixed or invisible).

### Dr Francesca Pasqualicchio

Specialist Orthodontist  
BDent

Dr Francesca Pasqualicchio qualified from the University of Turin/Italy in 2003. Her career in dentistry has included work in hospitals and private dental private dental practices for the past 12 years.

After earning her dental qualification, she gained experience in orthodontics treating children and adults at the Department of Orthodontics of the University of Turin, where she qualified in Orthodontics in December 2007.

Dr Pasqualicchio has been continuously updating her clinical skills by attending many post-graduate courses.

#### Treatments

- Ceramic/metal braces
- Functional appliances
- Incognito braces
- Removable braces
- Invisible braces

## Oral Surgeon

### Dr Jitesh Patel

Oral Surgeon  
BDS, AKC, MFDS RCS Ed, PgDip (general dentistry)

Jitesh qualified in 2014 and during his time at dental school gained a particular interest in oral surgery. He has taken the full three years to gain experience as a junior in multiple oral and maxillofacial surgery departments including a major trauma centre at the Royal Stoke. Since 2018 he has been working in an Oral and Maxillofacial surgery department as a specialty doctor gaining experience in dental surgical procedures. He looks to bring the same experience of managing anxious patients referred to the hospital for treatment under local anaesthetic to his work in the clinic.

This includes management of wisdom tooth issues that can include; adjustment of the gums around lower wisdom teeth, surgical extraction or coronectomy of high risk wisdom teeth; open/closed exposure of teeth for orthodontic treatment (as well as removal of ectopic/buried teeth/supernumerary teeth); cyst enucleation and apicectomy.

#### Treatments

- Surgical Extractions
- Coronectomy
- Adjustment of the gums around lower wisdom teeth

## Paediatric Dentistry

Dentists with special training dedicated to the oral health and treatment of children.

### Dr Sarah Bux

Dentist with Special Interest in Paediatric Dentistry  
BDS MFDS RSC (Ed)

Dr Sarah Bux qualified in 2012 from the University of Sheffield. She gained further hospital training in oral surgery and passed her Membership exams at the Faculty of Dental Surgery in Edinburgh.

She has collaborated on various research and quality improvement projects, including the use of children's Cognitive Behaviour Therapy (CBT) resources "Your Teeth, You Are in Control" in general practice and special-care settings. Her interest in behaviour management led to further training in children's immersive theatre and set design which she incorporates into her day-to-day practice.

Sarah is a seasoned, enthusiastic, well-rounded dentist and enjoys treating adults and children. Parents are keen for her to be their dentist after experiencing the quality and care of her treatment of their children. She works in various dental settings, including urgent care, special care, paediatric community and hospital services. Her proactive approach focuses on preventative and minimally invasive treatments, for which she routinely utilises various behaviour management techniques, including sedation.

#### Treatments

- Dental treatment under inhalation sedation (4 years and above)
- Stainless Steel Crowns
- Silver Diamine Fluoride
- Restorations
- Dental Trauma
- Extractions
- Pulp Therapy
- Management of patients with hypomineralised and hypoplastic teeth e.g MIH
- Management of anxious and special care patients

## Consultant in Special Care Dentistry (Sedation)

### Dr Najla Nizarali

Consultant in Special Care Dentistry (Sedation)  
BDS MFDS RCS (Eng) MSCD FDS RCS (Ed) MFDTS RCS (Ed)

Najla is a full time member of staff at the Department of Sedation and Special Care Dentistry at Guys and St Thomas' NHS Foundation Trust. She has a vast amount of experience in treating anxious/phobic patients under sedation techniques in both general practice and hospital setting.

#### Treatments

- Conscious Sedation
